# Case Files

Streamline offender investigations in one centralised location

Case Files is a DEMS (digital evidence management system) in SentrySIS that brings together all evidence, intelligence, and documentation related to a specific investigation, helping to streamline case management from start to finish.

Why retailers and crime partnerships use Case Files

Centrally manage repeat offender investigations, link incidents across multiple locations and securely collaborate with the police and colleagues, resulting in greater efficiency.

- Link incidents across estate stores into one case file.
- Store and manage digital evidence all in one place.
- Easily share case files with team members and the police.
- Monitor case progress in real time with full audit trails.
- Assign roles and tasks to streamline team collaboration.
- Strengthen prosecutions with well-organised digital case files.

UKPAC
UK Partners Against Crime

"The Case Files module has transformed how we manage investigations. We can now link incidents across multiple stores and counties, and seamlessly connect other SentrySIS data, making it easier to build comprehensive cases for police. Uploading and reviewing digital evidence is simple, helping us build stronger cases faster for the police."

Dennis Adams, Crime Hub Manager, UKPAC
